## **About Fabled**

The Company has an experienced management team, with multiple years of involvement in mining and exploration in Mexico. The Company's mandate is to focus on acquiring precious metals properties in Mexico with blue sky exploration potential.

The Company has entered into an agreement to acquire the Santa Maria Project from Golden Minerals, a high-grade silver-gold property situated in the centre of the Mexican epithermal silver-gold belt. The belt has been recognized as a significant metallogenic province, which has reportedly produced more silver than any other equivalent area in the world. The Santa Maria property has never been systematically explored.
